PROFILE

Informatics Engineering graduate (Universitas Muhammadiyah Surakarta, Excellent/Unggul accreditation) with a career focus in UI/UX Design and Web Development. Experienced in designing interfaces for original case-study projects across web and mobile platforms, and in building full-stack systems including an integrated Firebase Cloud Messaging platform and a Mediapipe pose-detection model integration that earned a Gold Medal at the Youth International Science Fair. Proven leadership managing a 120+-member student organization, with a strong problem-solving orientation and a track record of delivering functional, user-centric digital products.

EDUCATION

Universitas Muhammadiyah Surakarta **2022-2026**

Bachelor of Informatics Engineering (GPA:3.73/4.00)

- General Chair of the Informatics Engineering Open Source Forum, Campus Ambassador of the Faculty of Communication and Informatics, Website Programming Laboratory Assistant, Thesis Bureau Assistant, and IT Team Maintenance Lab.

SMA Negeri 1 Bawang **2019-2022**

Mathematics and Natural Sciences (MIPA).

EXPERIENCE and PROJECTS

FullStack Developer -Posturely (Posture-Screening Web App) **Jan 2026-Apr 2026**

Gold Medal - Youth International Science Fair International Competition

- Architected and built a full-stack posture-screening web app end-to-end using React-Vite and Laravel, integrating a Mediapipe pose-landmark detection model.
- Delivered a production-ready application tested and validated by practicing physiotherapists.
- Presented the project in a live international judging round (Innovation Science category, panel of 2 judges), earning the Gold Medal for product innovation.

Freelance Ui/Ux Designer **Nov 2025-Feb 2026**

Overlogic Universe - SDIT School Financial-Managemet System

- Conducted UX research to define core requirements and system flow for a school financial-management platform.
- Ran collaborative requirements research with the QA team throughout the interface-design process.
- Designed a style guide, low- to high-fidelity prototypes, and interaction flows for three distinct user roles (Principal, Staff, and Head of Staff).
- Presented final designs to stakeholders and carried the resulting feedback into the development handoff.

FullStack Developer Project – Village Community Complaint Platform **Oct 2025-Feb 2026**

AdsaWonokerso - Final Thesis Project

- Conducted UX research and community interviews to identify needs and pain points, guiding the design of an accessible digital solution for a diverse user base.
- Designed and developed an end-to-end system architecture for the complaint-reporting platform.
- Integrated Firebase Cloud Messaging for real-time push notifications between residents and village officials, achieving a System Usability Scale (SUS) score of 80+ (“Excellent” rating).
- Secured Intellectual Property Rights (IPR/HKI) registration for the system and successfully defended the thesis before the examination panel, earning an A grade.

Ux Designer **Jul-Sep 2025**

Shesafe - Gemastik National Student Competition

- Conducted user research on SDG 5 (Gender Equality), focused on digital solutions for protecting women in emergency situations.

- Designed a high-fidelity interactive prototype meeting the competition's technical and design requirements.

Laboratory Assistant and IT Team Maintenance

Jan 2025-Jul 2025

Website Programming Practicum – Universitas Muhammadiyah Surakarta

- Co-designed the practicum teaching strategy with fellow assistants, structuring sessions as 40% concept briefing and 60% hands-on, in-depth practice.
- Delivered module-based instruction and one-on-one support, helping students work through technical questions and difficulties.
- Prepared lab facilities and maintained smooth practicum operations from setup through session close.
- Installed and configured lab software, and maintained network and systems uptime throughout each session.

Internship Ui/Ux Designer

Apr 2025-Jun 2025

Kadang Koding Indonesia - MSME Digitalization Project

- Conducted UX research to uncover user needs for the MSME digitalization initiative..
- Redesigned key interfaces based on new development requirements, working closely with the development team.
- Designed a style guide covering interface components, user flows, and prototypes for a landing page and an operations-management dashboard.
- Built a promotional landing page for the digitalization program using React and the Aceternity UI component library.

ORGANIZATION

Chairman of Forum Open Source Teknik Informatika

Dec 2023-Dec 2024

Student Activity Unit – Universitas Muhammadiyah Surakarta

- Led a team of internal partners to plan and manage 20+ work programs and timelines for 120+ active members.
- Organized FOSTIFEST, a national-level flagship program featuring workshops and IT competitions, drawing 60+ participants
- Strengthened inter-unit and external partnerships while providing hands-on problem-solving support to members; grew membership by 60+ new recruits during the open-recruitment period.

CERTIFICATION & AWARDS

- | | |
|---|-----------------|
| 1. <u>Gold Medal – YISF International Competition</u> | Apr 2026 |
| 2. <u>Internship Ui Ux – Kadang Koding Indonesia</u> | Jun 2026 |
| 3. <u>Assistent and IT Team Maintenance Lab - UMS</u> | Jul 2025 |
| 4. <u>Chairman – Forum Open Source Teknik Informatika</u> | Dec 2024 |

EXPERTISE AND SKILLS

Hard Skills: UI/UX Design, Wireframing, Prototyping, Figma, React.js, Next.js, Tailwind CSS, Laravel, MySQL, Firebase (FCM), Python, Git, Mediapipe.

Soft Skills: Leadership, Problem Solving, Public Speaking, Team Communication, Project Management.
